All technical data is specified for unloaded units with standard equipment at an ambient temperature of $\pm 22 \,^{\circ}C \pm 3 \,^{\circ}C$ and a power supply voltage fluctuation of $\pm 10\%$. The temperature data is determined to BINDER factory standard following DIN 12880, observing the recommended wall clearances of 10 % of the height, width, and depth of the inner chamber. All indications are average values, typical for units produced in series. We reserve the right to change technical specifications at any time.
